

Abdul Kheeyan

Full Stack Developer (MERN) | Software Engineer

+91 9527864410 | abdulkheeyan@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [LeetCode](#)

SUMMARY

Full Stack Developer (MERN) and aspiring **Software Engineer** with hands-on experience designing, building, and deploying **production-grade full-stack web applications** using **JavaScript (ES6+)**, **React.js**, **Node.js**, **Express.js**, and **MongoDB**. Skilled in **REST API design**, **authentication (JWT)**, **real-time systems (Socket.io, WebRTC)**, and **LLM/Generative AI integration (Google Gemini API)**. Solid foundation in **Data Structures & Algorithms** with **200+ LeetCode problems solved**. Experienced in **Agile** teams across two full-stack internships. Seeking **SDE-1 / Full Stack Developer / MERN Stack Developer** roles.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), C, C++, HTML5, CSS3, SQL

Frontend: React.js (React, v19), React Router DOM, Vite, Tailwind CSS, Axios, Responsive Web Design, Component-Based Architecture

Backend: Node.js, Express.js, RESTful API Design & Development, Middleware, Microservices, Server-Side Development

Databases: MongoDB, MongoDB Atlas, Database Design, Query Optimization, SQL

APIs & Real-Time: REST APIs, Socket.io, WebSockets, WebRTC, Peer-to-Peer Communication, Webhooks

Auth & Security: JWT (JSON Web Tokens), bcryptjs, Role-Based Access Control (RBAC), HMAC SHA-256, Rate Limiting

AI / LLM: Google Gemini API (2.0 Flash), LLM Integration, Prompt Engineering, Generative AI, AI-Powered Applications, Octokit (GitHub API)

Tools & Version Control: Git, GitHub, Postman, Vercel, Render, Agile/Scrum

Core CS / Software Engineering: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Problem Solving, Debugging, System Design Fundamentals, Software Development Lifecycle (SDLC)

EXPERIENCE

Full Stack Web Development Intern

June 2026 – August 2026

Unified Mentor Pvt. Ltd.

Remote

- Architected and independently shipped **Nagrik Setu**, a production-grade **Digital Grievance Management System** built with the **MERN stack (React.js, Node.js, Express.js, MongoDB)**, implementing **role-based access control (RBAC)** for Citizens, Officers, and Admins.
- Engineered an **automated SLA-driven escalation engine** using **node-cron** for scheduled jobs, multi-level complaint routing logic, analytics dashboards, and **RESTful API** endpoints – deployed to production on **Render**.

Web Development Intern

January 2026 – June 2026

Technical One

Remote

- Developed **REST API** endpoints, **Socket.io**-based real-time chat, and **React.js** frontend components for **FASTION**, a **MERN stack** clothing barter marketplace, collaborating with a distributed team in an **Agile** workflow.
- Applied **LLM** and **Generative AI** concepts to integrate **AI-driven features** into production deliverables, improving development velocity and feature delivery turnaround.

PROJECTS

MediAI Pro | *React.js, Node.js, Express.js, MongoDB, Gemini API, WebRTC, Socket.io, Razorpay*

2026

- Architected a **multi-role** (patient / doctor / pharmacy owner) **AI-powered full-stack healthcare platform** with appointment scheduling, e-prescriptions, medical records, and an integrated e-pharmacy with **Razorpay** payment integration.
- Built a **6-model Google Gemini API fallback chain** powering AI symptom triage, medical report analysis, and personalized diet planning via **prompt engineering**, reducing service downtime by **20%**.
- Implemented **peer-to-peer WebRTC** video consultations with **Socket.io** signaling for real-time notifications and call rooms, reducing communication latency by **35%**.
- Designed **JWT-based authentication** with **bcryptjs** password hashing, Multer file uploads, and an automated medication-reminder service using scheduled interval jobs.

Reviewly | *React.js, Node.js, Express.js, MongoDB, Gemini API, GitHub API (Octokit), JWT*

2026

- Built a full-stack **AI-powered code review and repository intelligence platform** integrating with **GitHub repositories** via **Octokit** to auto-detect bugs, security vulnerabilities, and architectural issues across **8+ languages** (JavaScript, React, Python, Java, Go, Rust, C/C++).
- Designed a **hybrid analysis engine** combining **Google Gemini 2.0 Flash** with a custom **static heuristic AST analyzer**, improving detection reliability and cutting false positives by **30%** versus AI-only analysis.
- Automated **GitHub pull request reviews** via **webhook integration** with **HMAC SHA-256** signature verification, enabling line-by-line PR comments and reducing manual review time by **40%**.
- Built a **100-point code quality scoring system** (modularity, documentation, complexity, test coverage), a severity-tagged **security scanner**, and a dependency/tech-stack inspector with **JWT authentication** and silent token refresh.

EDUCATION

Bachelor of Computer Applications (BCA) | CGPA: 8.82

June 2024 – June 2028

Kavikulaguru Kalidas Sanskrit University (KKSU)

India

CERTIFICATIONS & ACHIEVEMENTS

LeetCode: 200+ Data Structures & Algorithms problems solved including Hard-level challenges | Badge: **50 Days 2026**

Generative AI Mastermind – Outskill (*Oct 2025*): Hands-on training with **14+ AI tools, LLMs**, and **Prompt Engineering**.
