SUMMARY

Full Stack Developer specializing in **MERN stack** development with hands-on experience building production-grade, **AI-integrated** web applications. Proficient in **React.js**, **Node.js**, **Express.js**, **MongoDB**, **WebRTC**, **Socket.io**, and **Google Gemini AI**. Skilled at architecting **scalable systems**, real-time communication, and robust **LLM-powered** features within **agile** environments.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3
Frontend: React.js (v19), Vite, Tailwind CSS, React Router DOM, Axios, Framer Motion
Backend: Node.js, Express.js, REST APIs, Socket.io, Multer, Nodemon
Database: MongoDB, Mongoose ODM, MongoDB Atlas
Authentication & Security: JWT, bcryptjs, HMAC signature verification, role-based access control
AI / APIs: Google Gemini API, GitHub API, LLM integration, Razorpay, WebRTC
Tools: Git, GitHub, Postman, Vercel, Render, CI/CD

EXPERIENCE

Web Development Intern January 2026 – June 2026 *Remote*
Technical One

- Completed a 6-month **full-stack** web development internship, delivering assigned features using **React.js**, **Node.js**, **Express.js**, and **MongoDB** in an **agile** environment.
- Participated in comprehensive **AI/ML** training sessions covering **Large Language Models (LLMs)** and **Generative AI**, integrating **AI-driven** features into project deliverables.

PROJECTS

MediAI Pro | MERN Stack, Gemini API, WebRTC, Socket.io, Razorpay 2026

- Architected a multi-role (**patient / doctor / pharmacy**) **AI-powered** healthcare platform featuring appointment booking, **Razorpay** processing, and a digital Health Vault.
- Engineered a 6-model **Google Gemini API** fallback chain for **AI** symptom triage, reducing service downtime by **~20%**.
- Implemented peer-to-peer **WebRTC** video consultations with **Socket.io** signaling, eliminating third-party infrastructure and reducing communication **latency by ~35%**.

CodeVault | React.js, Node.js, GitHub API, LLMs, UI/UX Design 2026

- Engineered an **AI-driven code analysis tool** that dynamically fetches repositories via **GitHub APIs** to automatically analyze codebases, identify bugs, and suggest structural refactoring.
- Integrated **LLM-powered** logic to review code quality in real-time, enforcing best practices and significantly reducing manual debugging time for developers.
- Optimized backend database queries and implemented frontend lazy loading, decreasing data retrieval **latency by ~40%** and enhancing the overall speed of the SPA.

EDUCATION

Bachelor of Computer Applications (BCA) June 2024 – June 2028
Kavikulaguru Kalidas Sanskrit University (KKSU) India
Bachelor of Commerce (B.Com) July 2024 – June 2027
Yashwantrao Chavan Maharashtra Open University (YCMOU) Nashik, India

CERTIFICATIONS

Generative AI Mastermind Oct 2025
Outskill

- Completed intensive program on **Generative AI**, **LLMs**, and **prompt engineering**, gaining hands-on experience with **14+ AI tools** for software development workflows.

ChatGPT & AI Tools Workshop 2026
Be10x

- Completed hands-on workshop covering **ChatGPT (GPT-4)** and **AI-powered automation** techniques to streamline development workflows.
